Work Experience:

Jr. Python Developer

X-Byte Enterprise Solutions | Oct 2025 To Present

- Engineered and maintained scalable web scraping spiders and browser automation scripts using Scrapy, Playwright, Selenium, and BeautifulSoup to extract data from both static and dynamic JavaScript-rendered websites.
- Developed and integrated backend RESTful APIs using Django, Django REST Framework (DRF), and FastAPI to trigger scraping jobs and deliver structured data to end-users and internal systems.
- Processed, cleaned, and transformed raw extracted datasets using Pandas, ensuring high data accuracy before storing records in PostgreSQL, MySQL, and MongoDB databases.
- Generated analytical charts and visual reports using Matplotlib to track data trends, monitor scraping metrics, and present actionable insights to stakeholders.
- Implemented secure user access using Django Authentication and managed source code collaboration and version control via Git and GitHub.

Eduction:

Bachelor Of Computer Application

Gujarat Univesity, Ahmedabad, Gujarat | Apr 2025

Professional Summary:

- Goal-driven Python Backend Developer with hands-on experience building and maintaining 120+ live production APIs and automated data extraction pipelines using Scrapy, Playwright, Django, and FastAPI. Proven expertise in extracting Web and Mobile App data across global e-commerce platforms (Amazon, Walmart, Target, Instacart), processing large datasets with Pandas, and managing PostgreSQL, MySQL, and MongoDB databases. Dedicated to continuous learning and delivering scalable backend solutions in fast-growing environments.

Key Skills:

Python	Django	FastAPI
Flask	DRF	RESTful APIs
Django Auth	Scrapy	Playwright
Selenium	BeautifulSoup	XPath
Pandas	Matplotlib	Data Cleaning
Data Transformation	MongoDB	MySQL
PostgreSQL	Git & GitHub	PyCharm
HTML5	CSS3	JavaScript

Project:

[XB:49] E-Retail APIs & PnP Data Collection

- Developed and scaled 120+ live production REST APIs (Django & FastAPI) for a US client to extract real-time Web and Mobile App data across 18+ countries (US, UK, EU, APAC, MENA).
- Engineered automated spiders and app-level scrapers for global giants including Amazon (Global Web & App), Walmart, Target, Costco, Instacart, Kroger, Tesco, Flipkart, Zepto, Blinkit, DoorDash, and UberEats.
- Built advanced scraping workflows handling zipcode-specific inventory, authenticated login sessions, multi-keyword search, category pagination, and PDP extraction using Scrapy, Playwright, and Selenium.
- Standardized and validated large-scale datasets with Pandas, stored records in PostgreSQL/MongoDB, and generated API performance visualizations using Matplotlib.
